

OSA 2497-63

June 19, 1963

Dear Dick:

25X1A I am enclosing a preliminary copy of the experiments proposed by [ ] which have been designed around the use of your local test facility.

The material is incomplete; however, it should provide you with a better picture of the anticipated effort than we were able to convey during our recent meeting.

25X1A [ ] is experiencing problems with the equipment which may delay its delivery to the site by a week or two.

A revised activity schedule will be relayed to you as soon as the troubles are corrected.

Yours truly,

Wayne
